Stream Dead-Load Pre-Filter | Boundary & Scope

Public pre-contractual one-page terms | Fixed fee EUR 2,800 | 08 Nov 2026

Purpose

Avoid redundant streaming recomputation only with exact output equivalence. Work may conclude GO, NO-GO or INCONCLUSIVE; favorable performance is not guaranteed.

Included and test boundary

One approved recurring transformation in one isolated environment, 30 paired runs where feasible. One agreed competitive reference and acceptance oracle; up to 30 paired repeats per applicable configuration and scenario where technically feasible. Unsupported policies must be marked NOT TESTED.

One 45-minute kickoff, one 45-minute results call; 8-12 page evidence dossier, measurement matrix, aggregate results, SHA-256 manifest, reproducibility notes and written decision; one email clarification thread within five business days.

Client inputs and timetable

Client provides lawful de-identified sample, isolated environment, agreed baseline and measurements. Target ten business days from written acceptance of complete inputs; missing inputs pause time.

Fee, payment and change control

EUR 2,800 plus applicable taxes as agreed in the signed quote. 50% at mutually signed acceptance and 50% at delivery. Third-party labs/cloud and any extra meetings, reruns, samples, environments or modifications require a separately priced written change order.

Explicit exclusions

No client code modifications, production deployment/access, Kubernetes/live policy changes, architecture consulting, custom engineering, prolonged meetings, on-call, incident response, certification, support retainer, guaranteed savings, or private source/bitstream license.

Acceptance, IP and legal effect

Delivery of complete agreed outputs satisfies the diagnostic even for documented NO-GO. Client retains its data. Researcher retains pre-existing and new private software, algorithms and know-how; no IP transfer or permission to publish client traces.

This is a public standard-terms preview, not a signed agreement. Effective only through mutually signed quote and applicable confidentiality, tax and data-processing terms.
